Welcome Note By H.E The President of the University of Dammam

Dear Colleagues

It gives me great pleasure to welcome you to this distinguished academic activity which is based on scientific partnership between the University of Dammam and the University of Florida.

Such collaborate meetings between universities are meant to facilitate the exchange of experience, promote training and encourage research activities in a multicenter setting. This results in enriching the university staff with updated knowledge and support career advancement.

The University of Dammam, in its new era, endeavors to be a distinguished leading University. Rising from its deeply-rooted history, academic heritage and accumulated experience, the university will strive to achieve the target objectives and meet the goals of the leadership and the expectations of the university staff. It aims to endow with constant international links through utilizing current and advanced means of communication technology. Enveloping the provinces of the Eastern Region with its geographic stretch, it acts an affluent resource of eminent experience, offers higher education and provide the required positive impact in its societies. In support for the rising increased incidence of Breast Cancer in our communities and in an attempt to provide the optimal patient care, the University of Dammam has taken the lead in acquiring the most recent advanced technology of intra operative radiotherapy for the treatment of Breast Cancer. This serves in promoting the early detection strategies and further offers higher chances towards complete cure.

In closing, I would like to take this opportunity to express my sincere appreciation to the Department of Surgery and all organizers of this event. We hope that you have a productive experience and enjoy your stay.

Thank you.

Abdullah Bin Mohammed Al Rubaish M.D

Chairman, Department of Surgery Note

Dear Colleagues

On behalf of the department of Surgery, University of Dammam a sincere welcome to the 2nd International Breast Health Care Education Program which is held on the 14-17 March 2011 in the beautiful Coastal city of Al Khobar, Saudi Arabia. This meeting is the result of collaborate efforts between the University of Dammam and University of Florida. It is a product of hard work and commitment over the last 18 months by colleagues from both institutions.

The abundance of breast diseases in the region and the increased incidence of breast cancer over recent years characterized by advanced disease and young age at presentation raises great concern.

The symposium is designed to provide an updated knowledge with special emphasis on recent advances in diagnosis and treatment modalities.

Hand on Workshops are carefully structured to train candidates by experienced instructors on sentinel node biopsy and advanced breast imaging. These are expected to enrich candidates performance and aid in improving their clinical skills.

We would like to take this opportunity to extend our sincere thanks and appreciation to all colleagues who worked relentlessly in planning and contributing to the success of the symposium.

Special thanks to the course director Prof. **Shahla Masood**, University of Florida, and course co director Prof. **Maha Abdel Hadi**, University of Dammam for their synchronized efforts.

On behalf of the department of surgery, we would like to extend our sincere appreciation to H. E the President of the University of Dammam Dr. Abdullah Al Rubaish for his continuous support and encouragement.

We hope this symposium will be of great value to all participants resulting in positive impact on the community.

Thank you for your participation

Naif Al Awad. M.D

*The Second International Breast Health Education Program
A Multidisciplinary Approach to Breast Disease*

Course Director's Note

Dear Colleagues:

It is indeed a great pleasure to present to you the program of "The Second International Breast Health Education Program A Multidisciplinary Approach to Breast Disease." This meeting will be held on March 14-17, 2011 at the Sofitel Hotel in Al Khobar, Kingdom of Saudi Arabia.

As you are aware, breast cancer remains a global public health issue for which no cause or cure has been found. However, recent advances in diagnosis and therapy in this disease has demonstrated that it is possible to favorably impact breast cancer mortality by applying incremental changes in cancer care within a population. However, in reality, it is a major task to provide optimal breast health care to geographically diverse populations with different genetic backgrounds, social values, religious beliefs, lifestyles, and economic status. Cultural and political impediments play important roles in slowing the progress against breast cancer.

The barriers to reform are numerous and often difficult to comprehend. Therefore, the realization of the complexity of cancer care at an international level is a necessary initial step. This understanding will require an orchestrated and well-planned educational program that can highlight the challenges and promise of the delivery of optimal breast health care across the globe.

In order to contribute to this goal the University of Florida College of Medicine - Jacksonville in partnership with the University of Dammam has organized this unique education program.

This program is representation of an effective collaborative relationship among medical centers and physicians with shared vision in providing opportunities for exchange of evidenced based scientific information and international networking.

We hope that you will consider joining us in this important symposium in the beautiful city of Al Khobar.

Shahla Masood, M.D.
Course Director

*The Second International Breast Health Education Program
A Multidisciplinary Approach to Breast Disease*

Course Co-Director's Note

Dear Colleagues

It gives me great pleasure in welcoming you to 2nd international Breast Healthcare Education Symposium which is supported by the encouragement of H.E **Dr. Abdullah Al Rubaish** the President of the university of Dammam and the Chairman of the Department of surgery Dr. **Naif Al Awad**.

It is certainly an honor and privilege to partner with the Course Director Dr. **Shahla Masood** from the prestigious University of Florida College of Medicine- Jacksonville's Breast Health Education Program, in a joint effort to improve the breast healthcare services in the region. This meeting is certainly enriched by the interest of immanent Speakers and Moderators who willingly agreed to share their experience with you. The sessions are carefully designed to accommodate regional experience and stress on an integrated and multidisciplinary approach.

As you are all aware breast cancer continues to be ranked first among females worldwide. This emerging dilemma of increased prevalence of breast cancer among young females in our communities coupled with deficiencies in women health awareness and inherited misconceptions result in delayed presentations, grave outcomes and over burdened healthcare services. To women, mutilating Mastectomy is the only known option propagated from one generation to another by word of mouth. Despite the current advanced communication era we are still unable to entirely overcome these encrypted beliefs.

Supported by the university administration we are privileged as one of the first centers in the region to acquire the highest technology of intra operative radiotherapy treatment for breast cancer. Thus, improving our capabilities in providing optimal patient care.

Your input this meeting is expected to encourage regional continuous and regular series of Breast educational programs thus, promoting awareness and standardizing breast care.

It is worth mentioning that the success of this meeting is due to the relentless work of the Committees and the secretarial teams from both the University of Dammam and the University of Florida.

We are confident that this symposium will impact positively on your experience.

Thank you for your active participation.

Maha Abdel Hadi. MD

*The Second International Breast Health Education Program
A Multidisciplinary Approach to Breast Disease*

Monday 14 March 2011

12:00 p.m. – 05:00 p.m. **Registration**

The Opening Ceremony

Under the Patronage of His Royal Highness
Prince Mohammed Bin Fahd Bin Abdul Aziz Al Saud
Governor of the Eastern Province

Preliminary Program

Tuesday 15 March 2011

07:30 a.m. – 08:20 a.m. **Registration**

08:20 a.m. – 08:25 a.m. **Citation of the Holy Quran**

08:25 a.m. – 08:35 a.m. **Welcome Remarks**
Naif Al Awad, M.D.

08:35 a.m. – 08:55 a.m. **The Value Global Breast Health Education in Improving Patient Care**
Shahla Masood, M.D.

08:55 a.m. – 09:10 a.m. **Current Overview and Introduction**
Maha Abdel Hadi, M.D.

09:10 a.m. – 09:30 a.m. **Introduction of Intra Operative Radiotherapy at University of Dammam**
Mohammed Keshtgar, M.D.

09:30 a.m. – 09:50 a.m. **BREAK AND POSTER SESSION**

Session I

Moderators

Breast Cancer in the Region

Naif Al Awad, M.D., Henry Lynch, M.D. & Shaym Parashar, M.D.

09:50 a.m. – 10:10 a.m. **Cancer Challenges in the Arab World (Pan Arab Declaration)**
Sami Khatib, M.D.

10:10 a.m. – 10:30 a.m. **Prevalence of Breast Cancer in Countries of the Region**
Laila Al Abood, M.D.

10:30 a.m. – 11:00 a.m. **Breast Cancer in Medically Underserved Population: Challenges & Promises**
Joe Harford, Ph.D.

11:00 a.m. – 11:30 a.m. **PANEL DISCUSSION**

11:30 a.m. – 12:30 p.m. **PRAYER & LUNCH**

The Second International Breast Health Education Program A Multidisciplinary Approach to Breast Disease

Tuesday 15 March 2011

Session II

Moderators

Regional Experience in Breast Care

Sami Khatib, M.D., Abdul Rasak Al Addad, M.D. & Ahmed Al Faraj, M.D.

12:30 p.m. – 12:50 p.m.

Molecular and Histopathological Overview of Breast Cancer in Developing Countries

Shahinaz Bedri, M.D.

12:50 p.m. – 01:10 p.m.

Benign Breast Disease Follow-up in Countries with Limited Resources

Ahmed Fahal, M.D.

01:10 p.m. – 01:30 p.m.

Misdiagnosing a Breast Cancer: Clinical, Radiological and Pathological Points to Consider

Muna BaSalaim, M.D.

01:30 p.m. – 01:50 p.m.

Management of Breast Cancer Complications

Omar Shamieh, M.D.

01:50 p.m. – 02:10 p.m.

Breast Cancer in Sudan: Limitation of Management

Kamal Eldin Hamad, M.D.

02:10 p.m. – 02:40 p.m.

PANEL DISCUSSION

Session III

Moderators

Palliative Care

Mohammed Hegazi, M.D., Nada Al Amri, MSc, & Omar Shamieh, M.D.

02:40 p.m. – 03:00 p.m.

Approach to Breast Cancer from Prevention to Palliative Care

Joe Harford, Ph.D.

03:00 p.m. – 03:20 p.m.

The Integration of Palliative Care Services into Routine Clinical Care

Mohammed Foudah, M.D.

03:20 p.m. – 03:40 p.m.

Role of Nursing and the Value of Nursing Training in Palliative Care

Deena Al Jawi

03:40 p.m. – 04:00 p.m.

PANEL DISCUSSION

04:00 p.m.

PRAYER AND END OF DAY ONE

Wednesday 16 March 2011

08:00 a.m. – 08:30 a.m.

Registration

Session IV

Moderators

Breast Cancer Risk Factors

Dalal Al Tamimi, M.D., Abdul Wahid Al Meshekes, M.D. & Roland Holland, M.D.

08:30 a.m. – 09:00 a.m.

The Story of Breast Cancer Genes

Henry Lynch, M.D.

09:00 a.m. – 09:20 a.m.

Morphologic Risk Factors: Borderline Breast Disease

Shahla Masood, M.D.

09:20 a.m. – 09:40 a.m.

Risk Factors of Breast Cancer in Bahraini Women

Suhair Al Saad, M.D.

09:40 a.m. – 10:00 a.m.

Genetic Disparity Between Western and Arab Population

Thilo Dorek, M.D.

10:00 a.m. – 10:20 a.m.

BREAK AND POSTER SESSION

The Second International Breast Health Education Program A Multidisciplinary Approach to Breast Disease

Wednesday 16 March 2011

Session V

Moderators

10:20 a.m. – 10:40a.m.
10:40 a.m. – 11:00 a.m.
11:00 a.m. – 11:30 a.m.
11:30 a.m. – 12:30 p.m.

Risk Reduction Strategy

Hamid Al Wadaani, M.D., Bina Ravi, M.D., & Suhair Al Saad, M.D.

Management of the High Risk Patient

Henry Lynch, M.D.

Prophalactic Mastectomy

Shawna C. Willey, M.D.

PANEL DISCUSSION

PRAYER AND LUNCH BREAK

Session VI

Moderators

12:30 p.m. – 12:50 p.m.
12:50 p.m. – 01:10 p.m.
01:10 p.m. – 01:30 p.m.
01:30 p.m. – 02:00 p.m.
02:00 p.m. – 02:30 p.m.
02:30 p.m. – 03:00 p.m.
03:00 p.m. – 03:20 p.m.

Screening and Diagnosis of Breast Cancer

Vahit Ozmen, M.D., Hadia Al Shammery, M.D., & Saad Al Ghamdi, M.D.

Justification of Breast Cancer Screening

Iman Baroum, M.D.

MRI in Diagnosis and Follow Up of Breast Cancer Patients

Noor Al Naimy, M.D.

The Breast Ultrasound: Diagnosis and Tissue Sampling

Nadia Al Essa, M.D.

Advanced Technology in Breast Imaging

Fatima Al Tahan, M.D.

The Value Clinical, Pathology and Radiology Correlation

Roland Holland, M.D.

PANEL DISCUSSION

PRAYER AND POSTER SESSION

Session VII

Moderators

03:20 p.m. – 04:20 p.m.
08:00 p.m. – 11:00 p.m.

The Breast Journal Award Research Presentation

Shahla Masood M.D., & Maha Adel Hadi, M.D.

PANEL DISCUSSION

GALA DINNER

Thursday 17 March 2011

08:00 a.m. – 08:30 a.m.

Registration

Session VIII

Moderators

08:30 a.m. – 08:50 a.m.
08:50 a.m. – 09:10 a.m.
09:10 a.m. – 09:30 a.m.
09:30 a.m. – 09:50 a.m.
09:50 a.m. – 10:10 a.m.
10:10 a.m. – 10:30 a.m.

Breast Cancer Treatment I

Abdul Mohsin Al Mulhim, M.D., Rola Al Hogail, M.D., & Jaber Abbas, M.D.

Morphology and Biology of DCIS

Roland Holland, M.D.

Diagnosis and Management of In Situ Disease

Luigi Cataliotti, M.D.

Is Radiation Necessary for DCIS?

Maha Alidrisi, M.D.

Indications and Complications of Axillary Irradiation

Robert Kuske, M.D.

PANEL DISCUSSION

BREAK AND POSTER SESSION

The Second International Breast Health Education Program A Multidisciplinary Approach to Breast Disease

Pre Symposium Workshops

Monday 14 March 2011

Principles and Practices of Breast Cancer Sentinel Lymph Node Biopsy

02:00 p.m. – 02:45 p.m.	The concept, Evidence and Technical Aspects of Sentinel Node Biopsy in Breast Cancer Mohammed Keshtgar, M.D.
02:45 p.m. – 03:05 p.m.	Demonstration of Video on the Technical Aspects of Sentinel Node Biopsy Maha Abdel Hadi, M.D.
03:05 p.m. – 03:25 p.m.	Case Discussion Bina Ravi, M.D.
03:30 p.m. – 05:00 p.m.	Hands on Training on Simulators Mohammed Keshtgar, M.D., Maha Abdel Hadi, M.D. & Bina Ravi, M.D.
05:00 p.m.	Closing Remarks Mohammed Keshtgar M.D.

Objective of the Workshop

This workshop is designed to highlight the importance:

- Minimally invasive surgery strategies in Axilla.
- Indications and contraindications of Sentinel node biopsy .
- The value of sentinel lymph node biopsy in morbidity reduction and early recovery.
- Hand on training in Sentinel node biopsy

At the end of this workshop the candidate should be able to:

- Perform accurate selection for patients undergoing Sentinel node biopsy
- Grasp the techniques of the Procedure
- Appreciate the Value of Sentinel node biopsy and its feasibility in developing countries
- Participants will be issued with a Certificate of attendance from University of Dammam and University College London

Tuesday 15 March 2011

Advances in Breast Imaging & Tissue Sampling

01:00 p.m. – 01:30 p.m.	BIRADS Update Fatina Al Taham, M.D.
01:30 p.m. – 02:00 p.m.	Overview on Image-Guided Breast Biopsies Iman Baroum, M.D.
02:00 p.m. – 03:00 p.m.	Case Scenario: The Multidisciplinary Approach Fatina Al Taham, M.D.
03:00 p.m. – 04:00 p.m.	Hand-on Breast US Guided Biopsies Fatina Al Taham, M.D., & Iman Baroum, M.D.
04:00 p.m.	Closing Remarks Fatina Al Tahan, M.D.

Objective of the Workshop

This workshop is designed to highlight the need for integrating breast imaging with the comprehensive management of breast diseases. Special emphasis is made on recent advances of imaging techniques and tissue sampling to facilitate accurate diagnosis. With the advances of invasive radiology tissue sampling becomes an integral part in the early diagnosis of Breast cancer. Therefore, at the end of this workshop the candidate should be able to:

- Grasp the basic principles of Breast radiology
- Define the BIRAD categorization
- Value the Multidisciplinary approach
- Grasp the basics of image guided biopsies

The Second International Breast Health Education Program A Multidisciplinary Approach to Breast Disease

Symposium Description

The symposium provides a multidisciplinary overview of the diagnosis and treatment of all stages of breast cancer. Symposium faculty includes experts in the fields of surgery, oncology, pathology, radiology, and palliative care. The target audience includes clinicians, specialists, interns, nurses, students and scientists involved in the care and treatment of patients with breast disease, as well as research and education concerning this important disease.

Objectives

Upon completion of this course, participants should be able to:

- Recognize the rising incidence and challenges of Breast cancer in the region.
- Assess the realistic contribution of breast cancer screening mammography.
- Evaluate the diagnostic value of contemporary breast imaging in clinical management
- Appreciate the differences in tumor biology in different ethnic population.
- Display the need for Palliative care in the Region
- Describe the role of discovery breast cancer genes and the value of stratification of patients to enroll into various risk reduction strategies
